

Non-Preferential Certificates of Origin Online Issuance

The Japan Chamber of Commerce and Industry launched a system for issuing trade-related certificates in September 2020, and some local chambers of commerce and industry have started issuing non-preferential certificates of origin online using this system.

The system issues certificates as PDF files. PDF files and non-preferential certificates of origin printed on white printing paper from PDF files have the same validity as non-preferential certificates of origin created using conventional counterfeit-protected paper.

If you ever have any doubts about the authenticity of certificates issued online by local chambers of commerce and industry, the QR code on the certificate can be used to access a reference system that allows users to verify the authenticity and content of a certificate.
